

# A CALL TO ARMS

## Reference Sheet

### Advanced Turn Sequence (Page 25)

#### Initiative Phase

#### Movement Phase

Ships Move  
Fighters Move  
Anti-Fighter Attacks Resolved  
Scout Trait used

#### Attack Phase

Fighter Attacks and Dogfights  
Ships attack  
Roll Attack Dice  
Dodges  
Interceptors  
Shields  
Roll on Attack Table  
Gravitic Energy Grid  
Critical Hits  
Close Blast Doors / pak'ma'ra Redundant systems  
Boarding Actions

#### End Phase

Compulsory movement  
Damage Control performed  
Fighters Launched

### Attack Table (Page 8)

For each successful hit roll 1d6

|     |              |                                      |
|-----|--------------|--------------------------------------|
| 1   | Bulkhead Hit | No damage dealt                      |
| 2-5 | Solid Hit    | -1 Damage, -1 Crew                   |
| 6   | Critical Hit | As Solid Hit, also roll Critical Hit |

### Damage Table (Page 9)

Roll a D6 and add the ships negative Damage to the result

|       |                                                                                                                                       |
|-------|---------------------------------------------------------------------------------------------------------------------------------------|
| 1-6   | Running Adrift: Half Speed in End Phase until off the table                                                                           |
| 7-11  | Ship Destroyed: Burned out hulk, left stationary on table                                                                             |
| 12-17 | Ship Explodes: ship will run adrift then explode at the end of the next movement phase.                                               |
| 18+   | Ship explodes immediately. All targets within 4" suffer attacks equal to half the ship's starting damage (maximum 15AD). Remove ship. |

### Crippled (Page 9)

**When a ship is crippled:** All Turns reduce to 45°, -1 turn (min of one), Speed halved, on a 4+ Ship Trait destroyed. May only fire 1 weapon per arc. Lose Fleet Carrier, Command X, Interceptors and Admiral abilities.

### Skeleton Crew (Page 9)

**When a ship is Skeleton Crewed:** No Special Actions, only one weapon system may be fired, -2 to damage control, Troops halved. Lose Command X, Fleet Carrier and Admiral abilities.

### Critical Hits (Page 10)

Roll a D6 for each Critical Hit to determine the location then roll a second D6 to determine the effect.

|                                        |                                   | Damage | Crew | Effect                                 |
|----------------------------------------|-----------------------------------|--------|------|----------------------------------------|
| <b>1-2 - Engines</b>                   |                                   |        |      |                                        |
| 1-2                                    | Power Relays Destroyed            | -0     | -0   | -1 Speed                               |
| 3-4                                    | Thrusters Damaged                 | -1     | -0   | -2 Speed                               |
| 5                                      | Fuel Systems Ruptured             | -2     | -1   | -4 Speed                               |
| 6                                      | Engines Disabled                  | -3     | -1   | Ship moves as though adrift            |
| <b>3 - Reactor</b>                     |                                   |        |      |                                        |
| 1-2                                    | Capacitors Damaged                | -0     | -1   | -2 Speed, all weapons -1AD*            |
| 3-4                                    | Power feedback                    | -1     | -1   | Lose 1 random trait                    |
| 5                                      | Reactor Gas Leak                  | -0     | -3   | No Special Actions                     |
| 6                                      | Reactor Explosion                 | -3     | -4   | No SA, lose 1 random trait             |
| <b>4 - Weapons</b>                     |                                   |        |      |                                        |
| 1-3                                    | Targeting System Damaged          | -0     | -1   | All weapons -1 AD*                     |
| 4                                      | Power Fluctuations                | -0     | -0   | Each weapon fires only on 4+           |
| 5                                      | Weapons Offline                   | -2     | -2   | Random arc, 1 weapon may not fire      |
| 6                                      | Catastrophic Ammunition Explosion | -3     | -4   | Random arc, no weapons can fire        |
| <b>5 - Crew</b>                        |                                   |        |      |                                        |
| 1-2                                    | Fire                              | -0     | -2   | -                                      |
| 3-4                                    | Multiple Fires                    | -0     | -3   | Damage control, -1 penalty             |
| 5                                      | Localised Decompression           | -1     | -3   | -1 troops, no SA                       |
| 6                                      | Hull Breach                       | -2     | -4   | -2 troops, No damage control this turn |
| <b>6 - Vital Systems</b>               |                                   |        |      |                                        |
| (cannot be repaired by Damage Control) |                                   |        |      |                                        |
| 1                                      | Bridge Hit                        | -0     | -1   | No Special Actions                     |
| 2                                      | Secondary Explosion               | -1d6   | -1d6 | -                                      |
| 3                                      | Engineering                       | -4     | -3   | No Damage Control permitted            |
| 4                                      | Weapons Control                   | -4     | -4   | No firing out of 1 random arc          |
| 5                                      | Reactor Implosion                 | -2d6   | -4d6 | Lose 1 random trait                    |
| 6                                      | Catastrophic Explosion            | -4d6   | -2d6 | Lose 2 random traits                   |

\*These effects are cumulative

## Ship Traits (Page 16)

|                         |                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Adaptive Armour         | Halve Damage and Crew, round down. (min. of 1),                                                                                                                     |
| Advanced Anti-Fighter X | As anti-fighter but +1 to roll                                                                                                                                      |
| Advanced Jump Engine    | See rules (page 16 & 26)                                                                                                                                            |
| Afterburner             | All Power to Engines! doubles Speed                                                                                                                                 |
| Agile                   | Need only move ¼ of speed before turning, 1" between turns                                                                                                          |
| Anti-Fighter X          | Has X dice to roll against fighters hulls to destroy them, 2" range                                                                                                 |
| Carrier X               | Can launch <i>or</i> recover X squadrons per turn                                                                                                                   |
| Command +X              | +X to initiative. Not cumulative, lost when crippled or skeleton crewed.                                                                                            |
| Dodge X                 | 1d6 per hit, if result >= X, attack missed. Lost if Adrift or not moved.                                                                                            |
| Escort                  | May lend Anti-Fighter dice to ships within 8" and LOS                                                                                                               |
| Fleet Carrier           | +1 bonus to dogfight. Repair destroyed flights within 30". See rules. (page 17)                                                                                     |
| Flight Computer         | Crew Quality never less than 4, no penalties for being reduced to Skeleton Crew                                                                                     |
| GEG X                   | Reduces damage and crew taken by X, criticals not affected                                                                                                          |
| Interceptors X          | See rules (page 18)                                                                                                                                                 |
| Jump Engine             | See rules (page 18 & 26)                                                                                                                                            |
| Lumbering               | May not continue move after turning, one turn only; may not be lost                                                                                                 |
| Self Repairing X        | +1 to Damage Control, listed Damage repaired in End Phase                                                                                                           |
| Scout                   | 36" range. Instead of special action my roll CQ 8+ to reduce stealth by 1 or to allow friendly ships to re-roll one weapon AD against target that turn (not beams). |
| Shields X/X             | Stops X hits (hits multiplied by double etc), regenerates second number.                                                                                            |
| Stealth X               | After an Attack has been declared only hits on X, if distance > 20" add 1 to X, if < 8" minus 1, if target has already been hit -1 again.                           |

## Weapon Traits (Page 20)

|                  |                                                                                                                                              |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| Accurate         | Ignores Dodge value                                                                                                                          |
| AP               | +1 to AD                                                                                                                                     |
| Beam             | Ignores Interceptors; hits on 4+, if hit, re-roll until no hits is scored; may only split fire if targets are within 4"                      |
| Double Damage    | Damage and Crew x2, including Critical Damage, always cause one Damage, even if it is a Bulkhead hit                                         |
| Energy Mine      | Nominate point within range, all objects within 3" receive damage, which ignores Stealth, Interceptors and Dodge traits. Cannot cause crits. |
| Gravitic Shifter | May turn enemy ship 45 degrees, opposed CQ check.                                                                                            |
| Mass Driver      | Target must be Adrift or not moved. Ignores Shields, Interceptors and GEG.                                                                   |
| Mini Beam        | Hits on 4+, ignores interceptors                                                                                                             |
| One-shot         | May only be used once. Not used if Stealth roll failed.                                                                                      |
| Orbital Bomb     | May only be fired at planetary targets (troops and emplacements).                                                                            |
| Precise          | +1 on Attack Table                                                                                                                           |
| Quad Damage      | Damage and Crew x4, including critical damage. Causes 2 damage on Bulkhead hit.                                                              |
| Slow Loading     | May only fire every other turn, not fired if Stealth roll failed.                                                                            |
| Super AP         | +2 to AD                                                                                                                                     |
| Triple Damage    | Damage and Crew x3, including Critical Damage, always cause one Damage, even if it is a Bulkhead hit                                         |
| Twin Linked      | Missed AD, may be re-rolled                                                                                                                  |
| Weak             | -1 to AD                                                                                                                                     |

## Damage Control (Page 12)

Each ship may attempt to repair one critical hit effect per turn. An effect may not be repaired on the turn it is suffered. Choose an effect to repair and roll 1D6 and add the ship's Crew Quality. A total of nine or more means the chosen effect is repaired. Vital Systems may never be repaired this way.

## Special Actions (Page 13)

| Special action                               | Crew Quality Check | Effect                                                                                                                                      |
|----------------------------------------------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Activate Jump Gate!                          | Auto / Opposed     | See rulebook (page13 & 27)                                                                                                                  |
| All Hands to Deck!                           | Automatic          | +2 Damage Control, any Number of Critical Hits may be repaired; One weapon only.                                                            |
| All Power to Engines!                        | Automatic          | +50% Speed, no turns                                                                                                                        |
| All Stop!                                    | Automatic          | Move between 0 and ½ Speed, no turns                                                                                                        |
| All Stop and Pivot!                          | Automatic          | No movement last turn. Turn double turn rate. No movement. Fire one weapon.                                                                 |
| Close Blast Doors and Activate Defence Grid! | Automatic          | For each point of Damage & Crew on a 5+ is no Damage taken, as are the effects of Critical hits. Fire 1 weapon (except ships with only one) |
| Come About!                                  | 9                  | +1 Turning, or +45° on one turning                                                                                                          |
| Concentrate All Firepower!                   | 8                  | All AD, that missed may be re-rolled, only one target. Not beams, Twin Linked or E-mines.                                                   |
| Give Me Ramming Speed!                       | 9                  | +50% Speed, only one turn, must be crippled, see rules                                                                                      |
| Initiate Jump Point!                         | Automatic          | See rules (page 15 & 26)                                                                                                                    |
| Intensify Defensive Firepower!               | 8                  | Double Anti-fighter and Interceptors. Halve all weapon AD.                                                                                  |
| Launch Breaching Pods and Shuttles!          | Automatic          | Use Troops to board ship with 4". Target ship must have moved less than ½ <i>original</i> Speed and cannot be fired on.                     |
| Run Silent!                                  | 8                  | Stealth 4+ Trait (or Stealth +1, max 6); Speed score is halved, may not fire, may not turn, even if Quality check fails!                    |
| Scramble! Scramble!                          | 7                  | May launch an extra flight, carrier may launch extra 2                                                                                      |
| Stand Down and Prepare to be Boarded!        | Opposed            | See rulebook (page 15)                                                                                                                      |
